EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Doran Pace on 3/30/05.

The application has been amended as follows:

Claim 35 was replaced by the following:

- 35. A method for imaging an object in a container in a liquid environment, by scanning ion conductance microscopy, which comprises immersing said object in a first electrolyte liquid, placing a probe in said container with said object, wherein said probe contains a second electrolyte liquid, placing a first electrode in said probe and a second electrode in said container having said immersed object, vibrating said probe close to the object, at a given frequency, substantially normal to the surface of the object, wherein said vibration causes an ion current between said first electrode disposed within said probe and said second electrode in said container having said immersed object, detecting the ion current, monitoring modulation of the ion current resulting from said vibration of said probe while close to the surface of the object, controlling the distance of said probe from the surface of the object in response to the modulation of the ion current, wherein said probe includes a means for delivering an assay component to the object. --
